

CASE STUDY

Jetty Construction Project, Antarctica

CONSTRUCTION & INFRASTRUCTURE

facts & figures

CLIENT

A prime contractor supporting Antarctic research operations

LOCATION

Stockton, USA via Punta Arenas, Chile to Palmer Station, Antarctica

PROJECT PERIOD

2021 & 2023

TOTAL CARGO WEIGHT / VOLUME

2,180 mt

SCOPE OF WORK

TGP delivered the Palmer Station Pier Replacement Project (2021), which included the purchase, bagging, biosecurity and transport of 2,180 mt of gravel.

And TGP performed the Palmer Station Commercial Re-Supply Project (2023), which included a full-charter ice-class, Polar-coded vessel to transport fuel, provisions, gravel and personnel to the research station and a return voyage.

For one of the world's most remote construction sites, TGP was required to ensure a seamless and flawless delivery under extreme conditions.
